

## BC Series

### Product Description

The BC Series foils are primarily used for plastic decoration on leather gloves, napkin stocks, etc. These foils feature easy release and offer good abrasion resistance making this series a good choice for a wide number of applications.

BC Series foils are designed for fine line roll-on and vertical stamping applications, and can be applied inline, onto extruded plastic parts and moldings.

### Substrates

- ABS
- Lacquer Coated Pencils
- Polystyrene

### Physical Properties

- Carrier: 48 gauge (12 microns)
- Application area: Fine, medium and broad coverage

### Recommended Stamping Conditions

Substrates		Metal Die	Rubber Die
ABS, Lacquer Coated Pencils, Polystyrene	Temperature	250°-350°F/120° - 170°C	N/A
	Dwell	0.1 – 0.25 Seconds	N/A
ABS, Polystyrene	Temperature	N/A	210° - 250°F / 100° - 120°C
	Dwell	N/A	0.4 – 0.6 Seconds
