

Cosmetics

CFC's IMATA cosmetic specialty films and foils are not only decorative in nature, but also provide outstanding functionality. These metallized films are specially formulated with our advanced reflective coatings to give your cosmetic plastic packaging a mirrored finish and polished appearance that is chemical and scratch resistant.

These films feature easy release with sharp contours, excellent adhesion and chemical resistance. CFC's IMATA cosmetic specialty films and foils are superior for banding, broad coverage and very fine detail applications.

Features

- State-of-the-art curing process that improves resistance to heat, abrasion and chemicals.
- High speed transfer, clean definition and banding.
- Excellent workability on a broad range of substrates
- High gloss finish
- Custom color matching service, as well as color matching to a wide variety of other foils to meet complete design requirements for other accompanying product items.

Markets Served

CFC's IMATA specialty films and foils for the cosmetic industry serve the following markets:

- Cosmetic containers (i.e., compacts, lipstick tubes, mascara tubes, etc.)
- Writing instruments
- Office equipment
