

Graphics

CFC has developed a new generation of specialty films and foils specifically geared towards the graphic industry. These were developed to work especially well in the round/round and round/flat printing industry with high-speed equipment.

In addition, CFC has made many new advances in this product line's construction and formulation. These enhancements include our ability to custom color match any shade you may require, from high gloss or matte finishes, to dark hues, vivid colors and subtle shades. CFC's graphic foils provide you with the decorating solutions you need.

Features

- Highly resistant to pressure
- High performance even on UV-cross linked systems
- Overprint acceptability
- Excellent workability on a broad range of substrates
- Consistent quality – produced in ISO 9001 Registered Facilities
