Features	Advantages	Benefits
Abrasion and Mar Resistance	Resistance to scratching and rubbing that could dull the finish.	Longer product life and customer satisfaction.
Heat Resistance	Finish stays mirror bright, eliminates iridescence.	Brilliant colors that sells the customer's package.
Outstanding Workability	Applies easily to plastic and coated substrates. Clean, sharp, flake free decoration that passes the most rigorous tape tests.	Improves productivity. No need for post-production clean-up.
Chemical Resistance	Resists attack by cosmetic products, such as alcohol, perfume, shampoo, hand lotion, etc.	Product durability which leads to customer satisfaction.
Overstamps	Previously decorated parts can be redecorated with the same foil. Lap lines are minimized.	Reduces scrap while maintaining aesthetically pleasing appearance.

Storage Conditions

Foil shelf life is directly related to the storage conditions. Whenever possible, inventory foil in a controlled atmosphere between 65-70°F (18-21°C), and at relative humidity of 65%. Cool dry conditions are best when a controlled atmosphere is not available. Avoid storing foil in direct sunlight, near open windows, near heat or conditions of dampness. Foil should not be allowed to become physically wet. If long-term storage is required, material should be polybagged and sealed.

NOTE: Instructions given herein are approximate and adjustment may be required in adapting materials for use in any specific application. The data presented is a result of careful and extensive research. However, since the actual conditions under which the materials may be used are beyond our control, no warranty of any kind, expressed or implied, concerning the use of the products is made. Date: 06/30/04.
