

## MAS Series

### Product Description

The MAS Series foils are primarily used for plastic decoration on containers, crates, buckets, housewares, etc. These foils feature easy release and have excellent abrasion and chemical resistance making this series a good choice for a wide number of applications.

MGS Series foils can be applied inline, onto extruded plastic parts and moldings and are specially formulated for vertical stamping, and fine line decoration.

### Substrates

- ABS
- Acrylic
- PVC
- SAN
- Styrenics

### Physical Properties

- Carrier: 75 gauge (19 microns)
- Application area: Fine, medium and broad coverage

### Recommended Stamping Conditions

	Metal Die	Rubber Die
Temperature	275° - 325° F / 135° - 160°C	325° - 400° F / 160° - 205°C
Dwell	0.3 – 0.8 Seconds	0.5 – 1.0 Seconds
