

PC Series

Product Description

The PC Series foils are primarily used for plastic decoration on appliances, cosmetics containers, housewares, etc. These foils feature an easy release from the carrier and have excellent abrasion and chemical resistance.

PC Series foils can be applied inline, onto extruded plastic parts and moldings and are specially formulated for vertical stamping, and fine line decoration.

Substrates

- Polycarbonate
- Nylon
- Butyrates
- Acrylic
- ABS
- Styrenics
- Polyethylene
- Polypropylene

Physical Properties

- Carrier: 75 gauge (19 micron) polyester
- Application area: Fine, medium and broad coverage

Recommended Stamping Conditions

	Metal Die	Rubber Die
Temperature	275° - 325° F / 135° - 160°C	350° - 375° F / 170° -190°C **
Dwell	0.4 – 0.8 Seconds	0.7 – 1.0 Seconds **
** - Polyethylene, Polypropylene – N/A
